

Storing Files & Documents

Last Modified on 10/11/2024 6:00 am MDT

Farmbrite makes it easy to upload files and documents and store them with your animals, plants, and equipment. You might need to save a bill of sale, test results, or certifications with any of those records. Check out these articles for walkthroughs on associating files with different record types:

[Images and Files of your Crops](#)

[Storing Equipment Photos and Files](#)

[Keeping Animal Images and Files](#)

You can also upload files to a File Library without associating them with particular records. To do this, navigate to the Account menu in the upper right, and choose Files. From there, simply click "Upload File" and select a file from your computer. Your files will be displayed in a grid for easy access. Click on the title of the file to open it and click on the red "X" to delete it from Farmbrite.

Supported File Types

Farmbrite allows you to upload the following file types:

- Microsoft Excel (.xls & .xlsx)
- Microsoft Word (.doc & .docx)
- PDFs
- Text Documents (.txt)

If there are additional file types you'd like to upload, please contact us.

Limits

Depending on your plan there are limits to the amount of images you upload. For additional information, please reference our [Pricing Page](#). If you need increased storage capabilities, check out our article on [Upgrading Your Subscription](#).

If you're getting an error when trying to access a PDF from this page you may have an Adobe plugin that is causing issues. Farmbrite secures your files and documents by ensuring anyone accessing the link is logged into your account, and if the download/view request is initiated by the Adobe plugin in, it may not be recognized as a valid reference and result in an error. Try disabling the plugin and accessing the file again, or contact us for questions.
