Getting Started with Crops

Depending on what types of plants you grow, getting your crops and fields set up may take a little time. We've tried to make this process as easy as we can by adding wizards and entering pre filled crop type information for you to choose from.

In your Farmbrite account you will find lots of information under the crops tab. You can enter your plants, fields, greenhouses and beds.

The main crops page

The main Crops page in Farmbrite provides you access to features to help you manage your crop and produce production. This includes:

- [Master Plant List](#) - My crops
- [Estimating Seed Orders](#) - Seed order calculations
- [Plant Details](#) - Entering information into the plant tab
- [Notes](#) - How to enter notes
- [Entering Crops](#) - Entering crops into your fields

Grow Locations

Grow locations in Farmbrite can be anywhere that you are growing plants and want to keep track of the productivity of that area. For example, a grow locations can represent a traditional 40 acre field of row crops, an orchard of trees or berries, or a market garden plot, or a raised bed, a greenhouse or even a grazing area for your livestock.

- [Entering Crops](#) - Entering crops into your fields
- [Harvest](#) - Recording harvests
- [Nutrients](#) - Recording nutrients
- [QR Codes](#) - Finding and printing field QR codes
- [Planning a field](#) - Information on planning your fields

Grow Locations

[New Grow Location](#)

NAME ^	TYPE	SIZE	BEDS
1/2 row	Field	0.0 acre	10
Alfalfa	Field	1.27 acre	N/A
Carrot bed	Field	0.25 acre	10
Cocoa orchard <small>FCD</small>	Field	1.65 acre	10
East View	Field	5.01 acre	N/A
Field B	Field	0.0 acre	10
Garden tower	Greenhouse	0.0 acre	100
Grazing 2nd field	Field	8.12 acre	N/A
Grazing field	Field	3.36 acre	N/A
Grazing field 3	Field	4.35 acre	N/A
Hemp <small>FHE</small>	Field	0.94 acre	10
Hemp location 1 <small>FHE</small>	Field	0.86 acre	10
Hydroponic	Greenhouse	0.0 acre	10

Crop Plan

A crop plan is a print out of your plants that have been entered, when they are growing and when they are expected to be harvested. You can change this data within the crops and the grow locations.

Location Map

A location map is available to draw property boundaries, buildings, fields and beds, animal enclosures, irrigation and buffer zones.

Crop Reports

You will find many standard reports for your crops under the reporting tab. This is a growing list, but at the moment we have the following reports available for crops:

Break even amount report, Estimate seed order report, Expected harvest, Harvest details, report Harvests summary report, Nutrients & Amendments report, Planting inventory report, Soil & nutrient samples report, Treatments report, Upcoming harvest report.

You can also create custom reports depending on your subscription type.
