Are you here looking for a way to get transactions into Quickbooks or another financial software? [Check out our article about integrating with Zapier](#), as it may provide a simpler solution for getting you data into another system.

If you'd like to download a spreadsheet of your Farmbrite accounting transactions, you can do so from your Farmbrite Transactions list. Navigate to Accounting from the left navigation menu and you'll land on a page displaying your transactions. Just click the Actions Menu (...) next to the Record a Transaction button, and you'll have two choices; Download Records and Download All Records.

[Download Records](#) gets you a .csv file of the records currently shown on the page. If you've filtered your transactions for a specific date, type, or payee, the export will only include the records that meet the search criteria.

[Download All Records](#) gets you a .csv download of all records in that section, regardless of the filters you have set.

The screenshot displays the Farmbrite Accounting interface. At the top, there's a search bar and user information. The main content area is titled 'Accounting' and includes a '2023 Summary' section with two charts: '2023 INCOME VS EXPENSE' (a line chart showing a peak in June) and '2023 EXPENSE CATEGORIES' (a pie chart). Below the charts, there are summary statistics: Revenue: \$6,844, Expenses: \$390, Profit: \$6,454. A 'Record a Transaction' button is visible. The bottom section is a table of transactions with columns for Date, Payee, Category, Description, Type, and Amount.
