

How do I add a pickup location to my shop?

Last Modified on 03/05/2019 2:37 pm MST

Pickup locations allow you to easily publish to your customers or CSA members where and when they can pickup products or product from you. You can add a new pickup location by clicking the green “Add New Location” button. For each pickup location you can provide the following information:

- Name
- Whether or not your pickup Location is currently active
- Address
- City
- Country
- State/Province
- Postal Code
- Day(s): What days is this pickup location open?
- Time: What times can people pickup from your location?
- Details: Any information or instruction for the pickup location. For example: “Find us a booth 42” or “The red building at the end of the drive”

All active pickup locations will be displayed on the “Pickup Locations” tab of your Farmbrite online site with the detail you specified and a link to get directions.
