

How do I process payments online?

Last Modified on 05/03/2024 12:25 pm MDT

When you decide to sell your products online you're enabling an online ecommerce system for your farm. Farmbrite will let you easily manage your products and available inventory and allow your customers to purchase those products. In order to process payments online you'll need to setup a merchant account with [Stripe Pay](#) and allow Farmbrite to use that merchant account as well as agree to the Farmbrite terms and conditions.

To connect your Stripe account, navigate to Market, and then choose Online Store. You'll see a link in your Settings tab to Connect Stripe Account.

The screenshot displays the Farmbrite interface for configuring an online store. The left sidebar shows navigation options like Schedule, Tasks, Livestock, and Market. The main content area is titled 'Online Store' and includes tabs for Settings, About Your Farm, and Look & Feel. The 'Settings' tab is active, showing a toggle for 'Sell Online' which is turned on. Below this, there are sections for 'Custom Shop Link', 'Online Shop Status', 'Customer Options', and 'Payment Options'. The 'Payment Options' section includes a warning icon and a link to 'Connect Stripe Account'. At the bottom of the settings, there are input fields for 'Email New Orders To' and 'Delivery Fee (Optional)', and a green 'Save' button.

Charges will be made through and deposited into your Stripe account. You will receive an email notification from Farmbrite when sales occur and be able to manage your orders and customers here.

Note: Stripe collects a processing fee on all successful transactions. This is in addition to any fee that Farmbrite may charge.

For any refunds associated with returns or cancellations will need to manually handle these transactions in your Stripe account.
