

Getting Started with Settings

Last Modified on 04/08/2026 9:45 am MDT

One of the first things you might do in your new Farmbrite account is take a look at your system settings. You can find these under the Gear icon in the upper right. The menu expands with a few choices, and we'll focus on the Settings selection first.

The screenshot displays the Farmbrite dashboard interface. At the top left is the Farmbrite logo and a search bar. A vertical sidebar on the left contains navigation icons for Schedule, Tasks, Livestock, Plantings, Resources, Accounting, Market, Contacts, Farm Map, Climate, and Reports. The main content area is divided into several sections: 1. Weather for Littleton: Shows a current temperature of 52°F, a 'Feels like' temperature of 49°F, and a forecast for the next 6 hours (3PM to 8PM) with temperatures ranging from 52°F to 36°F. 2. Top Upcoming Tasks: A list of four tasks with due dates in February 2024, including 'Move Cow 03 to Grazing Field B' (High priority), 'Spray Asparagus' (High priority), 'clean pumpkin patch' (Low priority), and 'record daily expenses in farmbrite'. 3. Recent Orders: A bar chart showing a single order for February 2024. 4. Income vs Expense: A small bar chart showing a positive value for February 2024.

Settings

This is basic information like name, address, contact email address, and location data for your farm. You may have supplied some of this information when opening your account, but you can always update here. If you are trying to map your farm, but the starting location is not in the right spot, you can update your address here or move the pin on the map to have your farm map display a new area.

You'll also find administrative account settings here too. You can select your time zone, measurement system (imperial or metric units), and your currency. You will also see frost setting selections here, which control the default start dates for your plantings. They are automatically set by the hardiness zone selection, but if you are outside the United States you can set the dates to whatever you'd like. You might even set them to no frost if you live in a tropical climate. Task statuses are displayed and configured here too, so if you want to create a unique workflow for your farm tasks, you can outline the steps here.

Users

One of the first things you might want to do in your new account is share it with your colleagues. If you have other people at your business who will use Farmbrite, you'll probably want them to check it out as well. You might all try it together and then discuss ideas for how you can incorporate the software into your day-to-day operations. To add more users, choose Settings in the upper right, and then Users. From there, you can [create new user logins for your teammates](#). You can assign permission levels to different users, so it's easy to have a farmhand try it out to see how it could help their processes too. Your teammates will get an email when you add them to set up their user login.

Chart of Accounts

You can use the Chart of Accounts setting to define custom accounting categories. [Check out this article and video for more information](#), but the overall concept is that you can create custom reporting categories for your income and expenses to better track what's relevant for your business. Your main selection here is if you want to customize the default schedule F categories to add more, or if you want to

start entirely from scratch and define all of your own custom categories. We think the Schedule F defaults are very useful for most farmers, but the choice is yours.

Custom Fields

If you explore Farmbrite and find that you need more fields to gather specific data relevant to your operation, you can create custom fields to track basically whatever you'd like! You can make more drop down menus, checklists, and checkboxes to add to your animals, plants, harvests, and more. [Read all about how to set them up and use them here.](#) Note that this feature is available for Farmbrite Plus and Premium subscriptions.

Files and Photos

Think of both of the sections as storage. You might upload PDFs or Microsoft Word documents with things like pedigree certificates and organic certifications. Or maybe you want to have some images on file for your farm, store, and marketing efforts. Just think of these sections as your "Farmbrite Cloud Drive" to

store files and photos that you'd like to retain and have online in your account.

The screenshot shows the Farmbrite dashboard interface. At the top left is the Farmbrite logo and a search bar. A vertical sidebar on the left contains navigation items: Schedule, Tasks, Livestock, Plantings, Resources, Accounting, Market, Contacts, Farm Map, Climate, and Reports. The main content area is titled 'WEATHER FOR AURORA' and displays a current temperature of 61°F. Below this, there are sections for 'TOP UPCOMING TASKS' (showing 'No Tasks Due') and 'RECENT ORDERS' (showing 'Not Enough Date to Chart'). A 'View all Tasks' link is at the bottom of the tasks section. The weather section also includes a 'Hourly' and 'Daily' toggle, and a table of hourly forecasts from 3PM to 8PM.

Hourly	Daily
3PM	4PM
5PM	6PM
7PM	8PM

Integrations and Webhooks

If you've explored your account and created custom fields but still need more, Farmbrite offers API integrations to connect the software with other apps and systems. This can be done via an API, webhooks, or Zapier. [You can read about the options here.](#) You might connect Farmbrite with things like Quickbooks, MailChimp, Local Line, Slack, Gmail, Outlook, and thousands more apps offered by Zapier.

The screenshot shows the Zapier website's 'Integrations' page for Farmbrite. The Zapier logo is at the top left, followed by navigation links for Product, Solutions, Resources & Support, and Pricing. On the right, there are links for 'Contact Sales', 'My Zaps', and 'CM'. The main heading is 'Farmbrite Integrations' with a 'beta' badge and the sub-heading 'Productivity'. Below this, the text reads 'Do more with Farmbrite integrations' and 'Zapier lets you connect Farmbrite with thousands of the most popular apps, so you can automate your work and have more time for what matters most—no code required.' A prominent orange button says 'Connect Farmbrite to 5,000+ apps'. At the bottom, two checkmarks indicate 'Free forever for core features' and '14 day trial for premium features & apps'.

Billing

You'll find all the relevant information for your account subscription here. You can change your plan and upgrade, or downgrade if you find that you don't need some features. If you find you don't want to use the software anymore, you can cancel your subscription here too. This tab also lets you change the card you have on file for future charges and shows you your past invoice history.
