

How do I change the time zone or address in my account?

Last Modified on 05/03/2024 12:28 pm MDT

If you move or expand your business operation you may want to update you address in Farmbrite. We use your address to determine your weather forecast, so to get accurate weather we need the right location! It's easy to update this information; just navigate to Account and choose Settings. You'll find address fields and a time zone menu below the map.

The screenshot shows the Farmbrite dashboard. On the left is a sidebar with navigation items: Schedule, Tasks, Livestock, Plantings, Resources, Accounting, Market, Contacts, Farm Map, and Reports. The top header includes the Farmbrite logo, a search bar, and links for Quick Add, Account, user profile (Chris), and Help. The main content area features four alert boxes: 1 Inventory Alert, 9 Overdue Tasks, 1 Upcoming Appointment, and 5 Locations Ready to Graze. Below these is a weather widget for 'NEDERLAND' showing a current temperature of 77°F, a forecast for the next 6 hours (1PM to 6PM) with temperatures ranging from 77°F to 80°F, and various weather icons and wind/precipitation indicators.

Speaking of the map - the address also controls the map display. If you've previously mapped your farm and have no updated your address, go ahead and remap your new fields. [Check out this help article](#) for a full walkthrough on how you can do this.
