

# Planning your Season

Last Modified on 12/22/2021 1:35 pm MST

## Planning your fields

Each season is a little different and you will want to plan this out in advance. Planning your season is easy through Farmbrite.

First you will want to create some plants. Do this by going to your Crops tab and selecting one of the crops we have preloaded or entering the information from the seed packets. The more information you enter the more data Farmbrite will help you calculate.

Then you will want to create a New Grow Location. Go through the set up wizard to enter details, map location and plantings.

Start by select a Name, add an internal id number or leave blank and one will be assigned, add a Location Type, Planting Format, and other data pertaining to the site you are setting up. Once you have this information in more tabs will open up and you can enter your plants into the rows.

If you have entered information into the plant data fields then it will help you calculate the amount of plants you can enter in the space you have, the expected harvest date, market value of the plants and how much you have harvested.

Here is a more in depth [article](#) on entering your plants.

The screenshot shows the 'New Grow Location' setup wizard in Farmbrite. The interface includes a sidebar with navigation options like Schedule, Tasks, Livestock, Crops, My Crops, Grow Locations, Crop Plan, Location Map, Resources, Accounting, Market, Contacts, Farm Map, and Reports. The main window displays the 'New Grow Location' form with a progress indicator at the top: 1 Details (active), 2 Map Location, 3 Add Plantings, and Complete. The form fields are as follows:

- Name:** Example: Northwest Field
- Internal Id:** Example: F001
- Location Type:** Field (selected), Greenhouse, Grow Room, Other
- Planting Format:** Four options are shown: 'Planted in Beds' (selected, with a blue border), 'Cover Crop', 'Row Crop', and 'Other'. Each option includes a small icon and a brief description.
- Growing Status:** Active
- Light Profile:** (empty dropdown)
- Description:** (empty text area)
