Can I Connect a Bank Account to Farmbrite?

We get many questions about how to link a personal bank account to Farmbrite. **We do not link to personal bank accounts at this time.** Data security is a top priority at Farmbrite and we prioritize security. This involves implementing strong passwords, enabling multi-factor authentication, regularly updating software to defend against vulnerabilities, and restricting third-party interactions. By taking these protective steps, we can secure your data, which protects your personal and organizational information this safeguards your digital assets and maintains the integrity of your account. Data security is a top priority here and we want to keep your information safe. In the future, we may revisit this but for now, this is our policy.

Importing Bank Account Transactions

If your goal is to get your bank transactions into Farmbrite, you can do so by importing them via spreadsheet. Your online bank account will likely let you export your transactions into a spreadsheet. No matter what format they provide, you can use Farmbrite's accounting transactions import template to format the data and ensure it is compatible with Farmbrite. If you have questions about getting the data out of your bank account, it is best to contact their customer support and inquire, as Farmbrite does not have access to your bank account to troubleshoot or provide instructions.

Farmbrite Integrations

Farmbrite also offers direct integrations in other ways. While this will is not a direct integration with your bank, you may be able to use [Zapier integrations](#) to send your data from other apps into Farmbrite. Zapier is also a "two way street", letting you send data from Farmbrite to other apps and systems as well. Beyond that, Farmbrite also offers a full API and webhook access to further support data transfers and sharing between Farmbrite and the other systems you use.
