

Animal Photos

Last Modified on 02/03/2025 12:19 pm MST

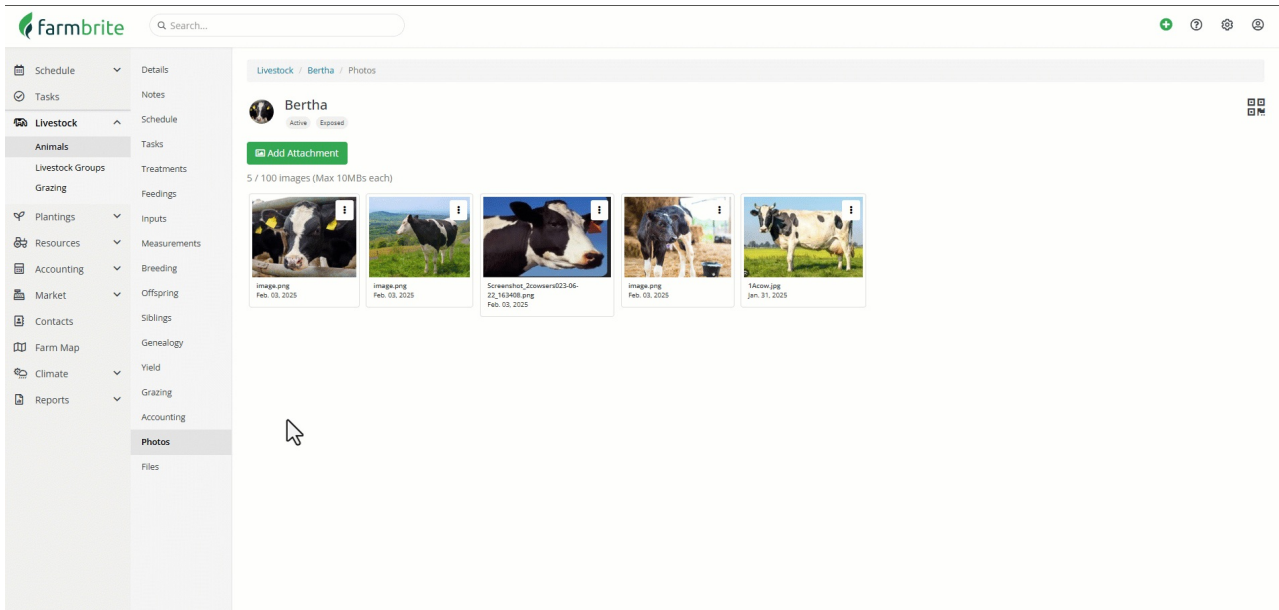

You'll certainly [record measurements](#) to track your livestock growth, but we all know the old adage "a picture is worth a thousand words", right? Sometimes you just want to see a photo of the animal, and even compare it to previous ones to marvel at their growth. All those feedings, treatments, and TLC is paying off! You can add photos to each animal in Farmbrite, and even use them as thumbnail images to make identifying your livestock records easier.

Photos are added an individual animal records, so you'll always navigate to Livestock, and then choose the animal you'd like to add a photo for. We'll pick our young Bull (Vinny) to add a new picture. To do this, we click on the animal, select Photos from the left, and then upload a new image.

The screenshot displays the Farmbrite interface for a specific animal record. The top navigation bar includes the Farmbrite logo, a search bar, and user account information. The left sidebar provides a comprehensive menu of application features. The main content area is dedicated to the 'Bull 01 [Vinny]' record, featuring a profile picture, a status indicator, and several data sections. The 'Basic Information' section lists key attributes such as name, type, tag number, status, and location. The 'Physical Characteristics' section includes fields for sex, weight, height, framescore, and condition score. The 'Birth Information' section has a link to view offspring. A 'Recent Activity' table on the right provides a log of recent events, such as location changes and movements.

Recent Activity	
May 22, 2023	Moved into location "northwest field b"
May 22, 2023	Moved to northwest field b
May 17, 2023	Moved into location "northwest field b"
May 17, 2023	Moved from northwest field b

The most recently uploaded image is used as the thumbnail by default. So as Vinny gets a bit older, and that first picture isn't exactly representative of his current look, we can just upload a new image and it's replaced automatically. But if you have a particularly great older image, you can always set it as the primary

image, and it will be used going forward, even if you upload newer images.

You can upload the following file types - .jpg, .jpeg, .png, .mov, .mp4, .m4v, and .avi.
