

Exporting Data

Last Modified on 12/22/2021 3:09 pm MST

You can download data from Farmbrite to a CSV from a variety of places, including:

- Livestock
- Crop Types / Plants
- Contacts
- Nutrients & Sample data
- Products
- Equipment
- Accounting Transactions
- Standard and Custom Reports

Downloading Data (Example)

The following example shows downloading contact data, but the process and export are generally the same regardless of what you're downloading.

If you'd like to download a spreadsheet of your Farmbrite contacts, you can do so from your Farmbrite Contacts Directory.

Navigate to Contacts from the left navigation menu, and you'll see a list of your Contacts displayed.

The screenshot shows the Farmbrite web interface. On the left is a navigation menu with items like Schedule, Tasks, Livestock, Crops, Resources, Accounting, Market, Contacts (highlighted with a green box), Farm Map, and Reports. The main content area is titled 'Contacts' and features a search bar and a table of contact information. At the bottom left of the table area, there is a link to 'Download all Contacts'.

Download all Contacts

This will download a .CSV spreadsheet file to your default downloads folder. It will usually display as a file download along the bottom portion of your web browser once completed.

The screenshot displays the FarmBrite software interface. On the left is a navigation menu with options: Schedule, Tasks, Livestock, Crops, Resources, Accounting, Market, **Contacts**, Farm Map, and Reports. The main area shows a 'New Contact' button and a table of 14 contacts. Below the table is a 'Download all Contacts' button. At the bottom, a Windows taskbar shows a file named 'farmbrite-contacts....csv' highlighted with a red box.
