

Exporting Data

Last Modified on 07/13/2023 11:07 am MDT

While we think you can get most of your work done in Farmbrite, we also know that you may need to use other software from time to time. If you need to export transactions, contacts, or other important data to use elsewhere, you can find many areas in Farmbrite that give you the option to download an export file. The export will be a .CSV spreadsheet file, which you could then use in your preferred spreadsheet program like Microsoft Excel or Google Sheets.

You can download data from Farmbrite to a CSV from a variety of places, including:

- Livestock
- Crop Types and Plants
- Contacts
- Nutrients and Sample data
- Products
- Equipment
- Accounting Transactions
- Standard and Custom Reports

Downloading Data

The following example will show you how to download contact data, but the process and export are generally the same regardless of what you're downloading.

If you'd like to download a spreadsheet of your Farmbrite contacts, you can do so from your Farmbrite Contacts Directory.

Navigate to Contacts from the left navigation menu, and you'll see a list of your Contacts displayed.

The screenshot shows the Farmbrite web interface. The top left navigation menu includes: Schedule, Tasks, Livestock, Crops, Resources, Accounting, Market, **Contacts** (highlighted with a red box), Farm Map, and Reports. The top right shows 'Account', 'Chris', and 'Help'. The main content area is titled 'Contacts' and features a 'New Contact' button and a search bar. Below is a table of 12 contacts with columns for Name, Type, Company, Email, Phone, and City. Each row has a red 'X' icon in the right margin. At the bottom, it says 'Displaying all 12 contacts' and 'Download all Contacts'.

NAME	TYPE	COMPANY	EMAIL	PHONE	CITY
Syzlak, Maurice	Buyer	Springfield Butchers Inc	moe@springfieldbutchers.com	(303) 555-8526	Springfield
Coles, Dennis	Employee	Copperdale Farms	denniscoles@mailinator.com	(303) 555-1254	Golden
Jones, Austin	Consultant		ajones@mailinator.com	(303) 555-5555	Denver
Jordan, Linda	Supplier	Feeding Frenzy Farms LLC	Lindaj@feedingfrenzyfarms.com	(303) 555-2542	East Boulder
Krustofsky, Herschel	Consultant	Franklin Grimes Consulting	Hesch@kmailinator.com	(303) 555-9228	Pinecliffe
Mann, Otto	Certifier	Boulder County	Kearney@bococertifies.com	(303) 555-8427	Nederland
Marcus, Regina	Veterinarian	Happy Tails Animal Clinic	regina@happytailsforlife.net	(303) 555-3534	Niwot
Roberts, Anna	Employee	Copperdale Farms	anna@copperdalefarms.com	(303) 555-2531	Superior
Wallace, Greg	Customer		greg@mailinator.com	(303) 555-1030	Lafayette
White, Walter	Wholesale Customer	Bison and Beef Company	walt@bisonandbeeforyou.com	(303) 555-7535	Broomfield
Wiggum, Clancy	Contractor	Alpine Contracting LLC	Cwiggum@alpinecontractors.com	(303) 555-8533	Westminster
Worthington, Carie	Buyer	American Meats	carie@americanmeatsmfgoinc.com	(303) 555-5473	Golden

Click the Actions button (... menu) and select Download All Contacts. This will download a .CSV spreadsheet file to your default downloads folder. It will usually display as a file download along the bottom portion of your web browser once completed.

Name	Location
Davidson Farms	
Syzlak, Maurice Buyer Springfield Butchers Inc	Springfield
Armstrong, Tim Customer	
Burkett, Michael Customer	
Burkett, Michael Buyer Epitaph Farms	
Burns, Chris Customer	
Chalmers, Gary Customer	Golden
Coles, Dennis Employee Copperdale Farms	Golden
Gordon, Trey Buyer PharmPhresh Limited	Burlington
Grimes, Frank Customer	
Hill, Henry Customer	
Jones, Austin Consultant JonesInFarms	Denver

Open the file with your preferred spreadsheet program. You can sort the data and remove rows or columns you don't need. For example, you may not need the ID field if you're planning on uploading this list to a email campaign tool.

Downloading a Filtered List

You'll have an additional option for exporting data in the Livestock, Transactions, and Task section of Farmbrite. When you click the Actions Menu, you see two choices, Download Records and Download All Records.

[Download Records](#) gets you a .csv file of the records currently shown on the page. If you've filtered your Livestock for a specific status, sex, date, weight, etc., the export will only include the records that meet the search criteria.

[Download All Records](#) gets you a .csv download of all records in that section, regardless of the filters you have set. This would help if you need records that are not routinely included by default, like deceased, butchered, or culled livestock.

Let us know how you might be using this data as we're always interested in developing new features and hearing feedback. Maybe we can help with what you need without having to export your information and use something else!
