

Feeding Livestock from Inventory

Last Modified on 07/18/2024 10:52 am MDT

Adding a Livestock Feeding

Go to the Livestock group or animal that you would like to feed.

Go to the feedings tab

Click on the New Feeding button

The screenshot shows the Farmbrite app interface. The top navigation bar includes the Farmbrite logo, a search bar, and user account information. The sidebar on the left contains navigation options: Schedule, Tasks, Livestock (expanded), Crops, Resources, Accounting, Market, Contacts, Farm Map, and Reports. The 'Livestock' section is further divided into Animals, Livestock Groups, Grazing, and Livestock Inventory. The 'Livestock Groups' section is expanded to show 'Grazers' with 59 animals. The main content area displays a 'Back to Livestock Groups' link, a 'FEEDINGS (LBS)' line chart showing a constant feed of 40 lbs/day for Alfalfa Hay from Jan 01, 2022, to Jan 04, 2022, and an 'AVERAGE LBS FEED PER DAY' bar chart for Jan 03, 2022, showing an average of 8.0 lbs per head/day. Below the charts, a summary states '40.0 lbs/day Feed Avg. Approx. 8.0 lbs per head/day' and '\$20.00 Feed Costs'. A 'New Feeding' button is visible. A table lists the feedings:

Date	Feed Details	Amount	Est. Cost	Animal Count
Jan. 04, 2022	Alfalfa Hay	1.00 Bales 40.00 lbs	\$5.00	5
Jan. 03, 2022	Alfalfa Hay	1.00 Bales 40.00 lbs	\$5.00	5
Jan. 02, 2022	Alfalfa Hay	1.00 Bales 40.00 lbs	\$5.00	5
Jan. 01, 2022	Alfalfa Hay	1.00 Bales 40.00 lbs	\$5.00	5

Displaying all 4 entries

You will bring up a form to fill out for the feeding. Add the details about which type of inventory you would like to choose, amount, costs, weights, notes and the date.

Note that the Group distribution will be for the total for the group (animals fed in the field) all animals or per head (for animals in stalls.) Click on the info tab(?) in the app for more information about this functionality.

Update Product Update product inventory (if applicable)

Remove From Warehouse Hay Barn

Lot Number Leave blank to pull from oldest lot

Reason Grazers Feb. 08, 2022 Feeding.

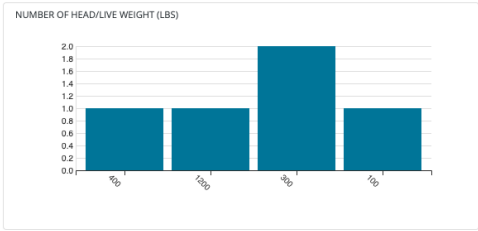

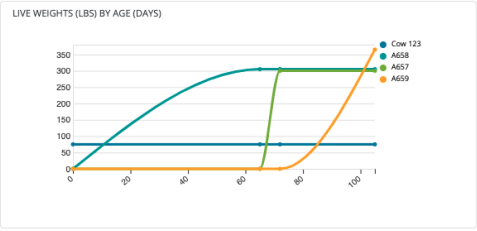

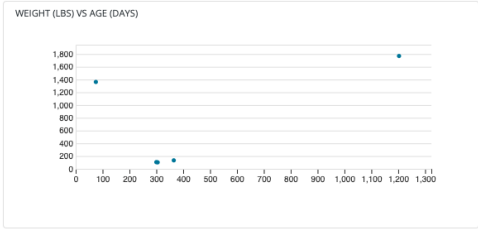

Cancel Remove Inventory

As you start to add feedings and measurements to your herd/animals you will start to see some graphs and charts come up with AVG lbs per day, AVG lbs per head per day and feed costs. But first let's add a feeding and take from inventory. (See first image)

Some of these charts are using information from the measurements tab. If you go to that screen you will find more charts and graphs giving you data on these numbers. See image below.
