

Breeding Reporting

Last Modified on 03/20/2024 2:42 pm MDT

If you've read some of our guides for [creating breeding records](#), [performing pregnancy checks](#), and [adding new animals](#), you might wonder how you can run reports and see this data as a summary. There are few different ways to get what you're looking for; you'll find charts, graphs, and custom reporting capabilities as well.

First, your Livestock homepage will display breeding statistics which you'll be able to filter and further refine. Just navigate to Animals, and you'll see them displayed on the top. You will also see labels/tags on records to indicate breeding status.

The screenshot shows the Farmbrite Livestock management interface. At the top, there is a search bar and navigation options like 'Quick Add', 'Account', 'Chris', and 'Help'. The main section is titled 'Livestock' and includes buttons for 'New Animal' and 'New Group'. Below this is a summary table of animal counts and percentages:

Animals	Cattle	Chicken	Goat	Other	Male	Female	Pregnant
128	88	33	4	3	10	85	35
100% Of 128	69% Of 128	26% Of 128	3% Of 128	2% Of 128	11% Of 95	89% Of 95	37% Of 95

Below the summary table is a table of individual animals with columns for Animal, Gender, Age, Last Weight, Status, and Type/Breed. The table lists several animals, including a Bison and several Cattle (Bull 01, Bull 02, Bull 04).

Animal	Gender	Age	Last Weight	Status	Type/Breed
Bison 17	Male	4 months	290.00	Active	Bison
Bull 01 (Big Herb) #48	Male	4 years	1,458.00	Active	Cattle Holstein
Bull 02 (Boomer) #51	Male	3 years	1,482.00	Active	Cattle Holstein
Bull 04 (Gary) #03	Male	2 years	1,510.00	Active	Cattle Holstein

Use the advanced filters to select specific gender, breeding status, or animals exposed within a specific date range. You might the time interval selections in the Date Exposed filter particularly useful!

Livestock

Criteria: Animal Types: All | Status: Active or Dry or Finis... | Filter

Animals	Cattle	Chicken	Goat	Other	Male	Female	Pregnant
128	88	33	4	3	10	85	35
100% Of 128	69% Of 128	26% Of 128	3% Of 128	2% Of 128	11% Of 95	89% Of 95	37% Of 95

Animal	Gender	Age	Last Weight	Status	Type/Breed
Bison 17	Male	4 months	290.00	Active	Bison
Bull 01 (Big Herb) #49	Male	4 years	1,458.00	Active	Cattle Holstein
Bull 02 (Boomer) #51	Male	3 years	1,482.00	Active	Cattle Holstein
Bull 04 (Gary) #03	Male	2 years	1,510.00	Active	Cattle Holstein
Bull 06 (Frankie) #33	Male	14 months	1,330.00	Active	Cattle Angus
Chicken Flock #33 RIR001				Active	Chicken Rhode Island Red
Cow 2 #2	Female	4 years	1,208.00	Active	Cattle

When you navigate to the Breeding tab on an animal's record, you'll be presented with charts and graphs showing breeding statistics for this individual animal. You can chart its breeding exposes over time, and break down the success and failure rates of different types of breeding methods. Conception and failure rates are calculated automatically, as well as the average days the animal has been in Open status.

Cow 2 - Holstein [2]

CONCEPTION RATES

METHOD SUCCESS RATES

ET Pregnant (33.33%)
NS Failed (66.67%)

Last Exposed	Est. Due Date	Avg. Days Open	Conception Rate	Failed Preg. Rate
9 Days Ago	274 Days From Now	107 Days	33%	66%
			1 Pregnancies	2 Failed

Record Birth | No Birth

Date Exposed	Method	Status	Bred With	Entered By
Jan. 07, 2023	Embryo Transfer	Pregnant	Bull 04 (Gary) - Holstein [03]	Chris
Dec. 02, 2022	Natural Service	Failed		Chris
Nov. 01, 2022	Natural Service	Failed	Bull 02 (Boomer) - Holstein [51]	Chris

There are also a few Standard Reports that can show you information for multiple animal's at once. Navigate to Reports, and then find Standard Reports to view a list. While you'll find lots of helpful reports for all aspects of your Farmbrite system here, you'll want to look under the Livestock & Grazing section to find breeding information.

The screenshot shows the Farmbrite interface. The sidebar on the left includes a 'Reports' section with 'Standard Reports' selected. The main content area displays a grid of report categories and their respective sub-reports:

- Accounting & Financials:** Accounts Receivable Aging, Cash Flow Statement, IRS Schedule F Summary Profit & Loss, Profit & Loss By Month, Spending by Category.
- Livestock & Grazing:** Break Even Amount, Breeding, Deaths & Losses, Drying Off, Due Dates, Fields being Grazed, Feeding Summary (ADG/FCR), Grazing Details, Grazing Summary, Livestock Inventory, Measurements, Pregnancy Checks, Reproduction Details, Reproduction Summary, Treatments & Vaccinations, Upcoming Treatments, Weaning, Yearlings, Yield Details, Yield Summary by Type.
- Plantings & Crops:** Break Even Amount, Estimate Seed Order, Expected Harvests, Harvests Details, Harvests Summary by Type, Nutrients & Amendments, Soil & Nutrient Samples, Treatments, Upcoming Harvests.

The **Breeding (Eligible) Report** is helpful for you to see a full list of your female animals that are currently in an open or exposed breeding status, or have no breeding status set at all. This could help you plan for your next breeding, as it also shows you the different breeds and weights of your livestock, helping you make informed decisions about compatible animals.

The **Breeding Surrogate report** will show you any animal that has had a breeding record using embryo transfers. This report shows you the number of transfers and how many/what percentage were successful or failed. It can help you find the most productive and receptive to embryo animals, and even shows you their birthing ease as well.

The **Due Date Report** and **Pregnancy Check Report** are somewhat similar. Both will show you the current breeding status, date bred, and expected due date of your animals, but the Due Date Report is filtered to only show you those in a Pregnant status, while the Pregnancy Check Report will also display those that are set to Exposed.

The **Reproduction Details Report** displays reproduction statistics for each female animal that gave birth within the past year. It shows conception and failure rates, birthing intervals and ease, average days in Open status, and total births. While the report defaults to showing this data from the past year, you can expand or shorten your date range using the filters at the top for a more expansive or granular view. Bonus: your charts and graphs at the top of the page will also update to display total offspring/by mother for this new range as well!

Lastly, the **Reproduction Summary Report** is very similar to the Reproduction Details above, but displays information for each animal type instead of the specific animals. This shows you total offspring by animal type, across the date range you select. This can help you get the big picture for your livestock breeding operation overall.

Also, be aware that **some of these reports can be customized!** If you'd like to see additional columns, groupings, sorting, and filtering options, just click the [Customize Report button](#) in the upper right. Your possibilities are limitless! (This does vary from plan to plan.)
