

Tracking Available Inventory

Last Modified on 04/13/2026 3:40 pm MDT

When tracking your animal feed, knowing what you currently have on hand is helpful, but you'll likely want to take future allocations into account as well. You can save some time by [creating repeat feedings for your livestock](#) that are scheduled into the future, so forecasting what you will have available then can help ensure you don't run out. Conversely, knowing what you have stored and accessible right now could also be useful in case you need to adjust your current feedings or feed additional animals. Farmbrite shows you both of the available and current quantities when working with inventory items.

When you view an inventory item, you'll see Current and Available inventory in separate fields.

The Current inventory displays what is currently in the warehouse or bin. This does not subtract future feedings; you'll see what you have on hand right now.

The Available inventory shows you what is available for use after taking future feedings into account. This does subtract your scheduled repeat feedings, giving you insight into what you will have available after the amount you've already committed.

You can see both of these in the upper left hand corner in the screenshot below, and each is also represented with different columns as well.

Inventory / Goat Feed

Goat Feed

90.00 pounds available ⓘ 140.00 pounds current ⓘ
\$180.00 Estimated Value

INVENTORY HISTORY

Warehouse	Bin	Current ⓘ	Available ⓘ
Central Warehouse	All Locations	140.00 pounds	90.0 pounds

We're working with a herd of goats in our example below. Note how the goat feed has 150lbs as current and available to start with. We fed the goats 10lbs today, and then scheduled 5 more feedings (10lbs each) out through the week for a total future use of 50lbs. When we return to our goat feed inventory, we will see 140 lbs currently in the bin since we fed 10 lbs today. We will also see 90lbs available, as we've allocated 50 lbs to future feedings.

Inventory / Goat Feed

Goat Feed
 150.00 pounds available ⓘ
 \$300.00 Estimated Value

Projected Empty: Oct. 25, 2024
 6.25 pounds per Day Usage

INVENTORY HISTORY

Warehouse	Bin	Current ⓘ	Available ⓘ	Est. Value
Central Warehouse	All Locations	150.00 pounds	150.0 pounds	\$300.00

The main inventory screen will also display both the available and current when they differ.

Eggplant, Purple Hayes		95.00 pounds	\$190.00
Elk Food		50.00 pounds	\$100.00
Figs		600.00 pounds	
Fish Food	Fishermans Choice	550.00 pounds	\$550.00
Flower Boost		59.00 pounds	
Fresno Fire		29.00	
Gloves		2,500.00	
Goat Feed		90.00 pounds 140.00 pounds current	\$180.00
Green Gecko Hot Sauce		24.00	\$168.00
Hay		475.00 pounds	\$950.00
Insecticide		17.00 fluid ounces	

This way you can now know how much you actually have on hand and how much you've allocated for future feedings at a glance without having to check the history and do manual calculations.
