

Audit Log Report

Last Modified on 04/29/2024 12:38 pm MDT

Have you ever looked at a record in Farmbrite and wondered who made the last changes to it? Perhaps you spotted a mistake, or maybe you saw an efficient improvement and want to know which one of your farmhands had such a great idea. You can now access an audit log report in Farmbrite to see the changes made, who made them, and when.

Note that this Audit Log Report is available to admin level users with a Farmbrite Premium subscription. Logs are kept for 90 days. If you upgrade to utilize this feature, your logs will start at the time you upgrade.

To access the Audit Log, navigate to Reports, and you'll see it under the Admin Reports section.

As we scroll through the log in the image above, you'll see that the audit logs tracks many different aspects of your Farmbrite system.

Logs are recorded when creating, updating, and deleting the following record types:

Livestock animal records	Plantings	Contacts	Equipment
Livestock breeding	Crops	Market orders and products	Equipment services
Livestock measurements	Grow locations/beds	Mapped places	Warehouses and bins
Livestock inputs	Treatments	Budgets	Inventory
Livestock groups	Nutrient applications	Accounting transactions	Webhooks
Livestock treatments	Harvests	Chart of accounts	Climate gauges
Livestock feedings	Notes	Changes to account settings	Custom fields
Livestock yields	Custom reports	User logins	Tasks and scheduled events

Logged records will track what was changed in an update under the details link. In the example below, we've updated the details about one of our recently birthed goats. We'll see a link to the goat's

record at the top of the log, with details about who made the change, and when it was done. Below that, you can see the old data on the left, with the new updated date on the right.

The screenshot shows the Farmbrite Audit Logs page. On the left is a navigation sidebar with categories like Schedule, Tasks, Livestock, Plantings, Resources, Accounting, Market, Contacts, Farm Map, Climate, and Reports. The main content area is titled 'Audit Logs' and includes a search bar and a 'Filter' dropdown. Below these is a table with columns for Date, User, Event, Resource, and Name. The table lists various system events such as updates to animals, creation of animal measurements, user logins, and deletions of webhooks and warehouses. The most recent entries are at the top of the list.

Date	User	Event	Resource	Name
Feb. 01, 2024 07:19am Less than a minute Ago	Chris	Update	Animal	Goat 1 - Boer [BG001]
Feb. 01, 2024 07:19am Less than a minute Ago	Chris	Create	Animal Measurement	Goat 1 - Boer [BG001]
Feb. 01, 2024 07:19am Less than a minute Ago	Chris	Update	Animal	Goat 1 - Boer [BG001]
Jan. 31, 2024 01:29pm About 18 hours Ago	Chris	Login	User	-
Jan. 31, 2024 12:35pm About 19 hours Ago	Chris	Login	User	-
Jan. 31, 2024 12:33pm About 19 hours Ago	Flanders	Login	User	-
Jan. 31, 2024 12:32pm About 19 hours Ago	Denny	Login	User	-
Jan. 31, 2024 10:39am About 21 hours Ago	Chris	Delete	Webhook	-
Jan. 31, 2024 10:39am About 21 hours Ago	Chris	Update	Webhook	-
Jan. 31, 2024 10:39am About 21 hours Ago	Chris	Create	Webhook	-
Jan. 31, 2024 10:38am	Chris	Delete	Warehouse	-

The log is chronological, so the most recent updates will be right at the top. However, if you're looking for something specific you can search and filter the report as well.

This screenshot is identical to the one above, showing the Farmbrite Audit Logs page. A mouse cursor is positioned over the search bar in the top right corner of the main content area, highlighting the search functionality.

If you'd like to save a copy of the report, you can download it to a spreadsheet or print it to a PDF.

Date	User	Event	Resource	Name	
Jan. 31, 2024 10:32am <small>About 21 hours Ago</small>	Chris	Delete	Planting Nutrient	Broccoli	Details

Jan. 29, 2024 10:13am	Chris	Update	Planting	Broccoli	Details

Some additional important details to be aware of:

- Orders submitted through your Farmbrite Market online shop are not tracked in the log, as they were created by your customers, not Farmbrite users. You'll see details about the order in the order section, not the audit log report.
- Updates that are done via the bulk select tool are recorded as a single action, not as records for each individual animal.
- Similarly, imports are also treated as a single action, and do not create audit logs for each individual record updated.
- Events triggered through the Farmbrite API are tracked in the audit logs.
- Remember, this feature is only available to admin level users on a premium level Farmbrite subscription.

Have questions about what you are seeing on the audit log report? [Reach out to us](#), we'll be glad to help!
