Feeding those generations is of course critical to recognize the highest yield and profit, and the **Grazing** feature will help ensure your fields are optimally rotated to provide the nutrition your animals need. Note that while you can move individual animals here, you'll likely move whole herds using the Grazing feature in the main Livestock Menu we discussed above. This section will also show you how long it's been since a field was last grazed and letting you know if it's ready to be grazed again. Regenerative grazing practices are now easier to track - your soil will thank you!

**Active Grazing Locations**

Name ^	Animal Count	Average Days in Location	Animal-Days Per Acre
Chicken Coop (Animal Enclosure) 0.03 acre	38 (1.67 AU)	6	334.4
Elk Enclosure (Animal Enclosure) 4.66 acre	2 (0.18 AU)	18	0.68
Elk Environment A 0.25 acre	1 (0.89 AU)	41	14.6
Field (East 2) 4.34 acre	3 (0.88 AU)	18	3.63

## Accounting

Since the ultimate goal of your business is to turn a profit, you will also find an **Accounting** section for each animal. You can record expenses like medications, feed, and supplies, with a total cost calculated as a break even point for an individual animal. Money you bring in from this animal's yield can be added as income, giving you a full snapshot of the costs and gains from this animal with your profit automatically calculated. Check out the available categories in the screenshot below - they are mapped to the US Schedule F Federal Tax Form, making your tax filing much easier. These can also be customized for non-US operations as well.

**Accounting**

Livestock / Livestock Groups / Chickens Rhode ... / Transactions

Chickens - Rhode Island Reds (88 Animals)

Revenue: \$872 Expenses: \$223 Profit: \$649 P&L Statement

Date	Payee	Category	Description	Type	Amount
Sep. 22, 2023	Springfield Supply Co.	Feed: chicken feed		Expense	-\$42.75

Feb. 19, 2024	weighed 890.0 height 36.0 bcs 6.5 temp 97.8 fec 10
Feb. 19, 2024	Cattle feed 10.0 pounds
Feb. 19, 2024	Yield 6.8 a
Feb. 19, 2024	Medication bovinex
Feb. 15, 2024	Yield 7.1
Feb. 08, 2024	Yield 6.5
Feb. 01, 2024	Yield 6.2
Jan. 31, 2024	Breeding status changed from exposed to pregnant
Jan. 23, 2024	Blood test pregnancy check - pregnant
Jan. 12, 2024	Hay 25.0 pounds
Jan. 11, 2024	Complete natural service
Jan. 09, 2024	Moved to elk environment a
Jan. 09, 2024	weighed 120.0
Jan. 03, 2024	Moved from mountain meadow east
Jan. 03, 2024	Moved into location "mountain meadow east"

## Livestock Groups

Every animal is an individual with unique needs, but Farmbrite knows that it is usually easier to work with multiple animals together as a herd or group. Specifically, we want to save you time - its quicker to move a herd of animals into a different grazing field with one action than it is to move them individually. This bulk update concept can be used when applying treatments, changing breeding statuses, adding notes, and much more. Creating a group also allows you to associate Tasks and Activities to it, so you can more easily assign work that is specific to a group of animals to your workers. You can even create set groups to work with animals you might not normally keep track of as individuals - perhaps a colony of bees or a brood of chicks.

Groups can be created with filters for gender, type, breed, birthdate, and much more. You can also manually assign animals to groups if you want to group different types of animals together as well.

## Reports

We know this is a lot of information to digest, so Farmbrite also provides **Livestock Reports** that will help you make sense of your data. These are found in the Reports menu on the left. You'll find all sorts of helpful analytics here - Average Daily Gain calculations, Treatment and Vaccination records, Yield information, and Profit and Loss/Break Even accounting reports. You'll start seeing value from these once you have your data in Farmbrite - the one stop shop to find helpful information can be key to streamlining your business operations and saving you time.
