Livestock Video Tutorial

Last Modified on 11/19/2025 12:21 pm MST

Check out the video below to take a tour and learn the basics to get you started with the Livestock features in Farmbrite.

Additional Articles and Videos to Explore

After you have watched the video, you can browse these articles to learn more about the specific features that you are interested in.

- **Getting Started**- If you'd like a written version of the video above, check out this article. Everyone learns differently, so if you'd rather read, take a look!
- **Creating Animal Records** - This would be a great first step to start setting up your animals. Check this out to see the different types of data you can store on your animal records, and how to start creating them.
- **Importing Animal Records** - Want to get them all in at once, from a spreadsheet? If you have previous spreadsheet data from another software, you may be able to import it all at once.
- **Creating Livestock Groups** - Connect your animals in groups to track them as a unit. You can feed and treat all of the animals in the group at once, and see breeding and measurement data compiled for the group as well. You'll also learn about the difference between Smart, Basic, and Set groups too! *Tip: use Set groups for animals like Poultry, Fish, and Bees.*
- **Animal Health and Wellness** - Taking care of your animals properly is likely one of your first priorities, so check out this whole section of our help center to learn more about taking measurements, recording environmental conditions, tracking illness and potential problems, and applying treatments and remedies for them.
