## Metric System

Go to your Account tab at the top right hand side of the page.

Go to Settings or Account Information. You will find the particulars of your account information here; name, address, timezone, etc.

Page down to below map. Directly under the timezone you will see a box for "Measurement System." Select either Metric or US Customary.

Go to the bottom of the page and click "Save Settings".

The screenshot shows the Farmbrite account settings page. The page is titled "Farmbrite Plan" and "Complete Plan". The form includes fields for Farm Name (Copperdale Gardens), Address (444 Copperdale Ln), City (Golden), Country (United States), State/Province (Colorado), and Postal Code (80403). Below these fields is a "Tagged Location" map showing a satellite view of the location. The map includes a red location pin and a "Report a problem" button. Below the map are fields for Latitude (39.9199194) and Longitude (-105.3797529). The Timezone is set to "(GMT-07:00) Mountain Time (US & Canada)". The Measurement System dropdown menu is highlighted in green, showing options for "US Customary" and "Metric". The Accounting Categories dropdown menu is also visible, showing "Metric" selected. Other fields include USDA Hardiness Zone, Average Last Frost Date, and Average First Frost Date.
