

# Completing Plantings

Last Modified on 03/11/2025 6:27 am MDT

If you are planning on planting crops in succession, you're likely cleaning out your fields and beds between plantings. After you complete your first harvest you might take down extra stalks, remove unwanted branches, and dig out roots to prepare for your next plants to be put in the ground.

Similarly, you may want to clean up your Farmbrite plantings page to remove plantings that you are finished with. You can do this by marking the planting as "complete". This is a great way to mark or indicate that you are finished with the planting and that it is no longer in the ground and actively growing.

You'll find the complete option in the actions menu of any planting in Farmbrite. Just click the 3 dots and choose "Mark Complete". As you see in the short video and images below; after the planting is marked complete, the planting will be shown in the History tab on the crop type. You will find the history tab on the left hand side navigation.

The screenshot displays the Farmbrite interface for a carrot planting. The sidebar on the left contains navigation menus for Schedule, Tasks, Livestock, Plantings, My Crops, Resources, Accounting, Market, Contacts, Farm Map, Climate, and Reports. The main content area is titled 'Carrot CA' and shows '1 Locations Planted' in Northwest Field C. A line graph displays 'EXPECTED POUNDS PER WEEK' with a data point for 'Jul 18, 2024'. Below the graph, a table lists planting details for Northwest Field C, including the amount (0.14 sqft), start date (Feb 18, 2024), and harvest date (Sep 04, 2024).

Type	Amount	Start	Harvest
Carrot Bed Bed 01	20 plants 20 Plants	Start Feb. 18, 2024 - Plant May 06, 2024 Start in Trays, Transplant... Ripening	Harvested on Sep. 04, 2024 (40 days late) 50 of 50 Pounds Harvested

This is slightly different when viewing your plantings directly from a Grow Location. In the example below, you'll see that completed plantings are removed from the Currently Planted tab but are still included in the Planting Year and the Harvested tabs respectively.

You will still see them in the History section as well.

The screenshot displays the Farmbrite web application interface. On the left is a sidebar with a navigation menu containing categories like 'Schedule', 'Tasks', 'Livestock', 'Plantings', 'Grow Locations', 'Resources', 'Accounting', 'Market', 'Contacts', 'Farm Map', 'Climate', and 'Reports'. The main content area is titled 'Northwest Field C' and shows a list of planting beds. At the top, there are tabs for '2024 Planting Year', 'Future Plantings', 'Currently Planted', and 'Harvested'. The 'Harvested' tab is selected, and a mouse cursor is hovering over it. The list of beds includes:

Bed ID	Status	Size
Bed: 01	Completed	400 sqft free
Bed: 03	Completed	50 sqft free
Bed: 04	Completed	299 sqft free
Bed: 05	Completed	0 sqft free
Bed: 02	Completed	300 sqft free
Bed: 07	Completed	300 sqft free
Bed: 08	Completed	300 sqft free
Bed: 09	Completed	300 sqft free
Bed: 10	Completed	300 sqft free
Bed: 11	Completed	300 sqft free

One last thing to be aware of; if you did not harvest the crop, it won't be shown on the harvested tab. You might find a situation where you lost a crop to pests, weather damage, or disease. In this case, you will find the completed planting in the history and year tab.
