

Connecting Inventory to Products

Last Modified on 04/24/2026 10:33 am MDT

After you have worked hard to harvest your crops and yield from your animals, you'll likely want to sell some of the items you ended up with. [Farmbrite has an entire Market section](#) for you to create your products and list them for sale in your online store, and then process and ship orders out to your customers. But what if not everything that you harvested is for sale?

Think about some of these situations :

- You harvested hay from your fields, but also need to keep some in reserve for overwintering your cows.
- You harvested various crops from your beds, but have some prepaid CSA shares that you need to set aside.
- You yields gallons of milks from your cows and dozens of eggs from your chickens to sell, but also run a small baking business where you need some of those harvests to create your manufactured products.

There are many more examples like this, but the main idea is the same; not all of your harvest should be for sale in your online store, as you might have preexisting plans for some of it. You can account for this with a few simple selections in your product and inventory setup.

The first step to account for this is to [create your products](#) and [inventory items](#).

When you create the product, you'll see an option to "Limit sales based on inventory". Checking that gives you a box to add how many are for sale in your market. In our example below we have created peppers to sell, and limited the sales to our current inventory of 25 pounds.

The screenshot shows the Farmbrite interface with a sidebar on the left containing navigation options like Schedule, Tasks, Livestock, Plantings, Resources, Accounting, Market, Dashboard, Products, Online Store, Orders, Pickup Locations, Contacts, Farm Map, Climate, and Reports. The main content area is titled 'Products' and features a 'New Product' button and a search bar. Below is a table of products:

Name	Available	Status	Category	Price
SA 5 Alarm Chili Sauce		Available		\$7.95
AV Ancho Vee Fish Sauce	0.00	Sold Out	Sauces	\$11.95 \$7.95
AH Anna Hiem's Anahiem Agro		Available	Sauces	\$12.50 \$11.50
AR Aris RES		Available		\$50.00
BF Balsam Fir		Available		\$80.00
BR Blue Raspberries		Available		\$5.00
BL Blueberries		Available		\$10.00
BR Broccoli	1,500.00	Available		\$2.00
BP Bronson Peppers	0.00 Pounds	Sold Out		\$5.00
BR Brussels	313.00	Available	Vegetables and Vegetable Products	\$2.50
CB CBD	24.00	Available	CBD Products	\$3.50 \$3.00
CS CSA 2024		Available		\$200.00
ER Carolina Reaper Sauce	6.00	Available	Sauces	\$13.95 \$11.95
Cucumbers		Available	Vegetables and Vegetable Products	\$3.00 \$2.00
One Egg		Available	CRD Products	\$5.00

Then when you create your inventory item (or edit an existing one), you'll have an option to associate that product to it. Selecting the product here establishes a connection with your inventory for two purposes:

1. When you add or remove from the inventory item from a harvest, delivery, or usage around your farm, you'll be able to check a box to update the linked product inventory (available for online sales) as well.

- When you sell the product in your store, you can then remove it from your inventory to fulfill the pick list and support traceability back to harvests.

In the image below we connected our Jalapeno Peppers product to this existing inventory item. Note our existing inventory of 25 pounds, matching what we already input on the product in the section above.

Item Name	Quantity	Value
Hot Peppers	Bam Bam Bronson Burns	0.00 pounds
Hot Peppers	Jalepeno	47.00 pounds
Hot Sauce	Spicy Dill	22.00
Hot Sauce	Down the Hatch	27.00
Hot Sauce	5 Alarm Chili	7.00
Hot Sauce	for Cats and Dogs	20.00
Insecticide		17.00 fluid ounces
Irrigation Water		4,200.00 gallons
Jalapeno Peppers		25.00 pounds \$50.00
Kidding Supplies		12.00 \$60.00
Large Square Bale		3.00 bales
Limes		10.00 pounds \$10.00
Liquid Fertilizer		250.00 gallons \$1,250.00
Lotsa Lots		170.00
Merciless Peppers		118.00 pounds \$29,500.00
Milk		25.30 gallons
Moose Food		4,895.00 pounds \$73,425.00
New Chicken Feed		9,900.00 pounds \$49,500.00
Oil	5w30	0.00 quarts
Peppers ((Hot)), Thai Dragon		68.00 pounds \$272.00

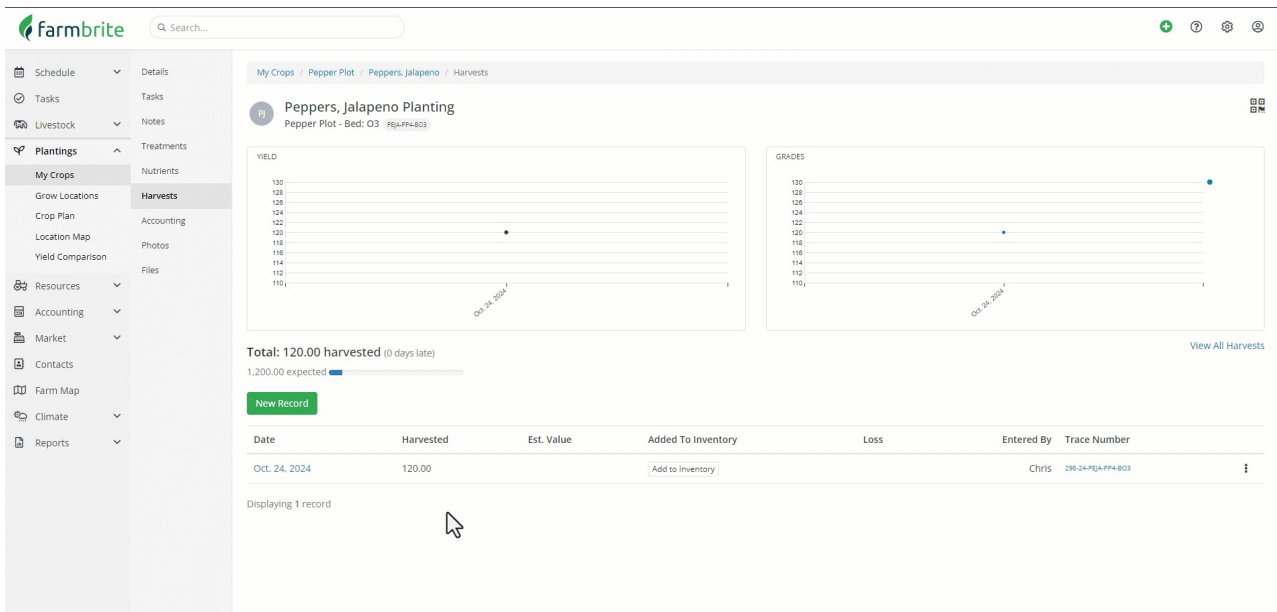

Now, when we add or remove from the inventory, we'll see an additional checkbox to "Update linked product amount available". Checking this box will increase the amount available for online sales in the product by the amount we add here. Of course, if you don't check this box, the quantity will still be added to your inventory, but the product quantity will remain the same. We are adding 30 pounds of peppers below and selecting that checkbox, so you'll see the total of 55 reflected in both the inventory item and product amount available for online sales.

Jalapeno Peppers
 25.00 pounds available @ \$50.00 Estimated Value
 Projected Empty: Nov. 03, 2025 (0.07 pounds Avg Daily Usage)

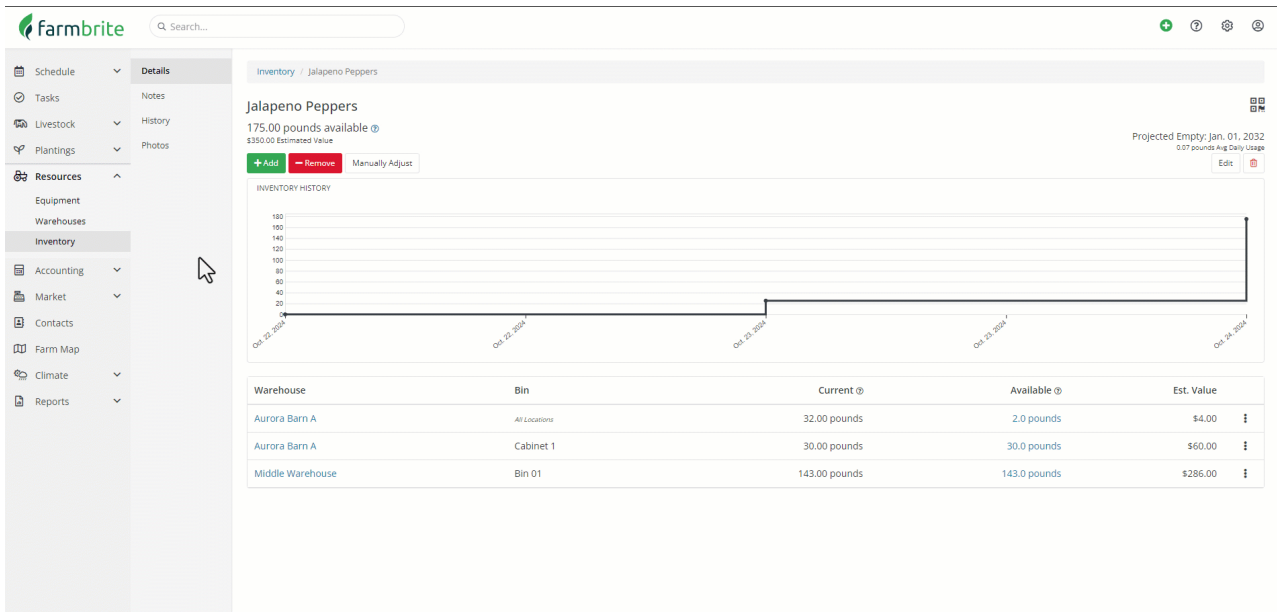

INVENTORY HISTORY

Warehouse	Bin	Current @	Available @	Est. Value
Aurora Barn A	All Locations	2.00 pounds	2.00 pounds	\$4.00
Middle Warehouse	Bin 01	23.00 pounds	23.00 pounds	\$46.00

This same checkbox is also available when you add to inventory directly from a harvest. We are using the same peppers below as our example, but this is true from an animal yield as well.

Finally, if you'd like that option to be selected by default for a particular inventory item, you can select the box to "Update product amount available when adding or removing" from the inventory item configuration. This could be help if the situations we outlined at the top of this article are never applicable for you, and that additions and removals should always be included in the product quantity available for sale online.
