

Viewing Orders by Source

Last Modified on 07/16/2025 11:07 am MDT

Scratching your head about how an order was recorded? If you'd like to know how an order was added to Farmbrite, you'll be able to see that on the order itself and in custom reports. You can also filter for the creation method and get an easy list of all orders added that way.

To do this, you'll navigate to Market, and then select Orders. You can open any order and you'll immediately see the entry method shown at the top. There are three possible options that could be shown.

- [Admin](#) - These orders were created administratively within Farmbrite, using the [Create New button](#) on the orders page.
- [POS](#) - These orders were recorded via the [Point of Sale system](#).
- [Online](#) - These orders were added using the [Online Shop](#).
