Accessibility Statement

Farmbrite is committed to making sure that our software is accessible. "Accessible" means that everyone, regardless of their abilities can access and use our software. We are committed to investing in accessibility, inclusive design, and an equitable experience for all.

Ongoing Efforts to Ensure Accessibility

Farmbrite uses the [Web Content Accessibility Guidelines \(WCAG\) version 2.2](#) as its guiding principles for accessible product design. As we create new products or features we utilize the principles of accessible design as an integral part of our design and development processes.

We acknowledge that we are not currently meeting WCAG 2.2 Level AA standards, but we are committed to working towards meeting or exceeding these standards. Today, we actively work to identify, prioritize, and remove accessibility barriers in our software. We continually test features for WCAG 2.2 Level AA compliance and do our best to address any issues and to meet or exceed the standards. We leverage a variety of tools including automated testing software and accessibility scanners to help us identify issues and areas for improvement.

Feedback and Support

We welcome comments on how to improve the accessibility of Farmbrite for users with disabilities and welcome your feedback. Please let us know if you encounter accessibility barriers by emailing us at support@farmbrite.com or by [contacting our team here](#).
